Wire Frame

Very simple website.

The navigation from the **Home** page is just the title. The title button brings you to the **book covers** page.

Typestyles

I chose Futura for this idea because of the very simple shapes that the font creates. Also being sans serif, the website has a very modern, easy feeling.

H1
Futura Bold
100px, 109 line height

Navigation
Futura Book
40px, 44 line height

Book Title
Futura Book
25px, 35 line height
Book
Futura Book
20px, 30 line height

This is what a link will look like.

This is what a link hover will look like.

Homepage

Very simple. The title being the navigation to the book covers.

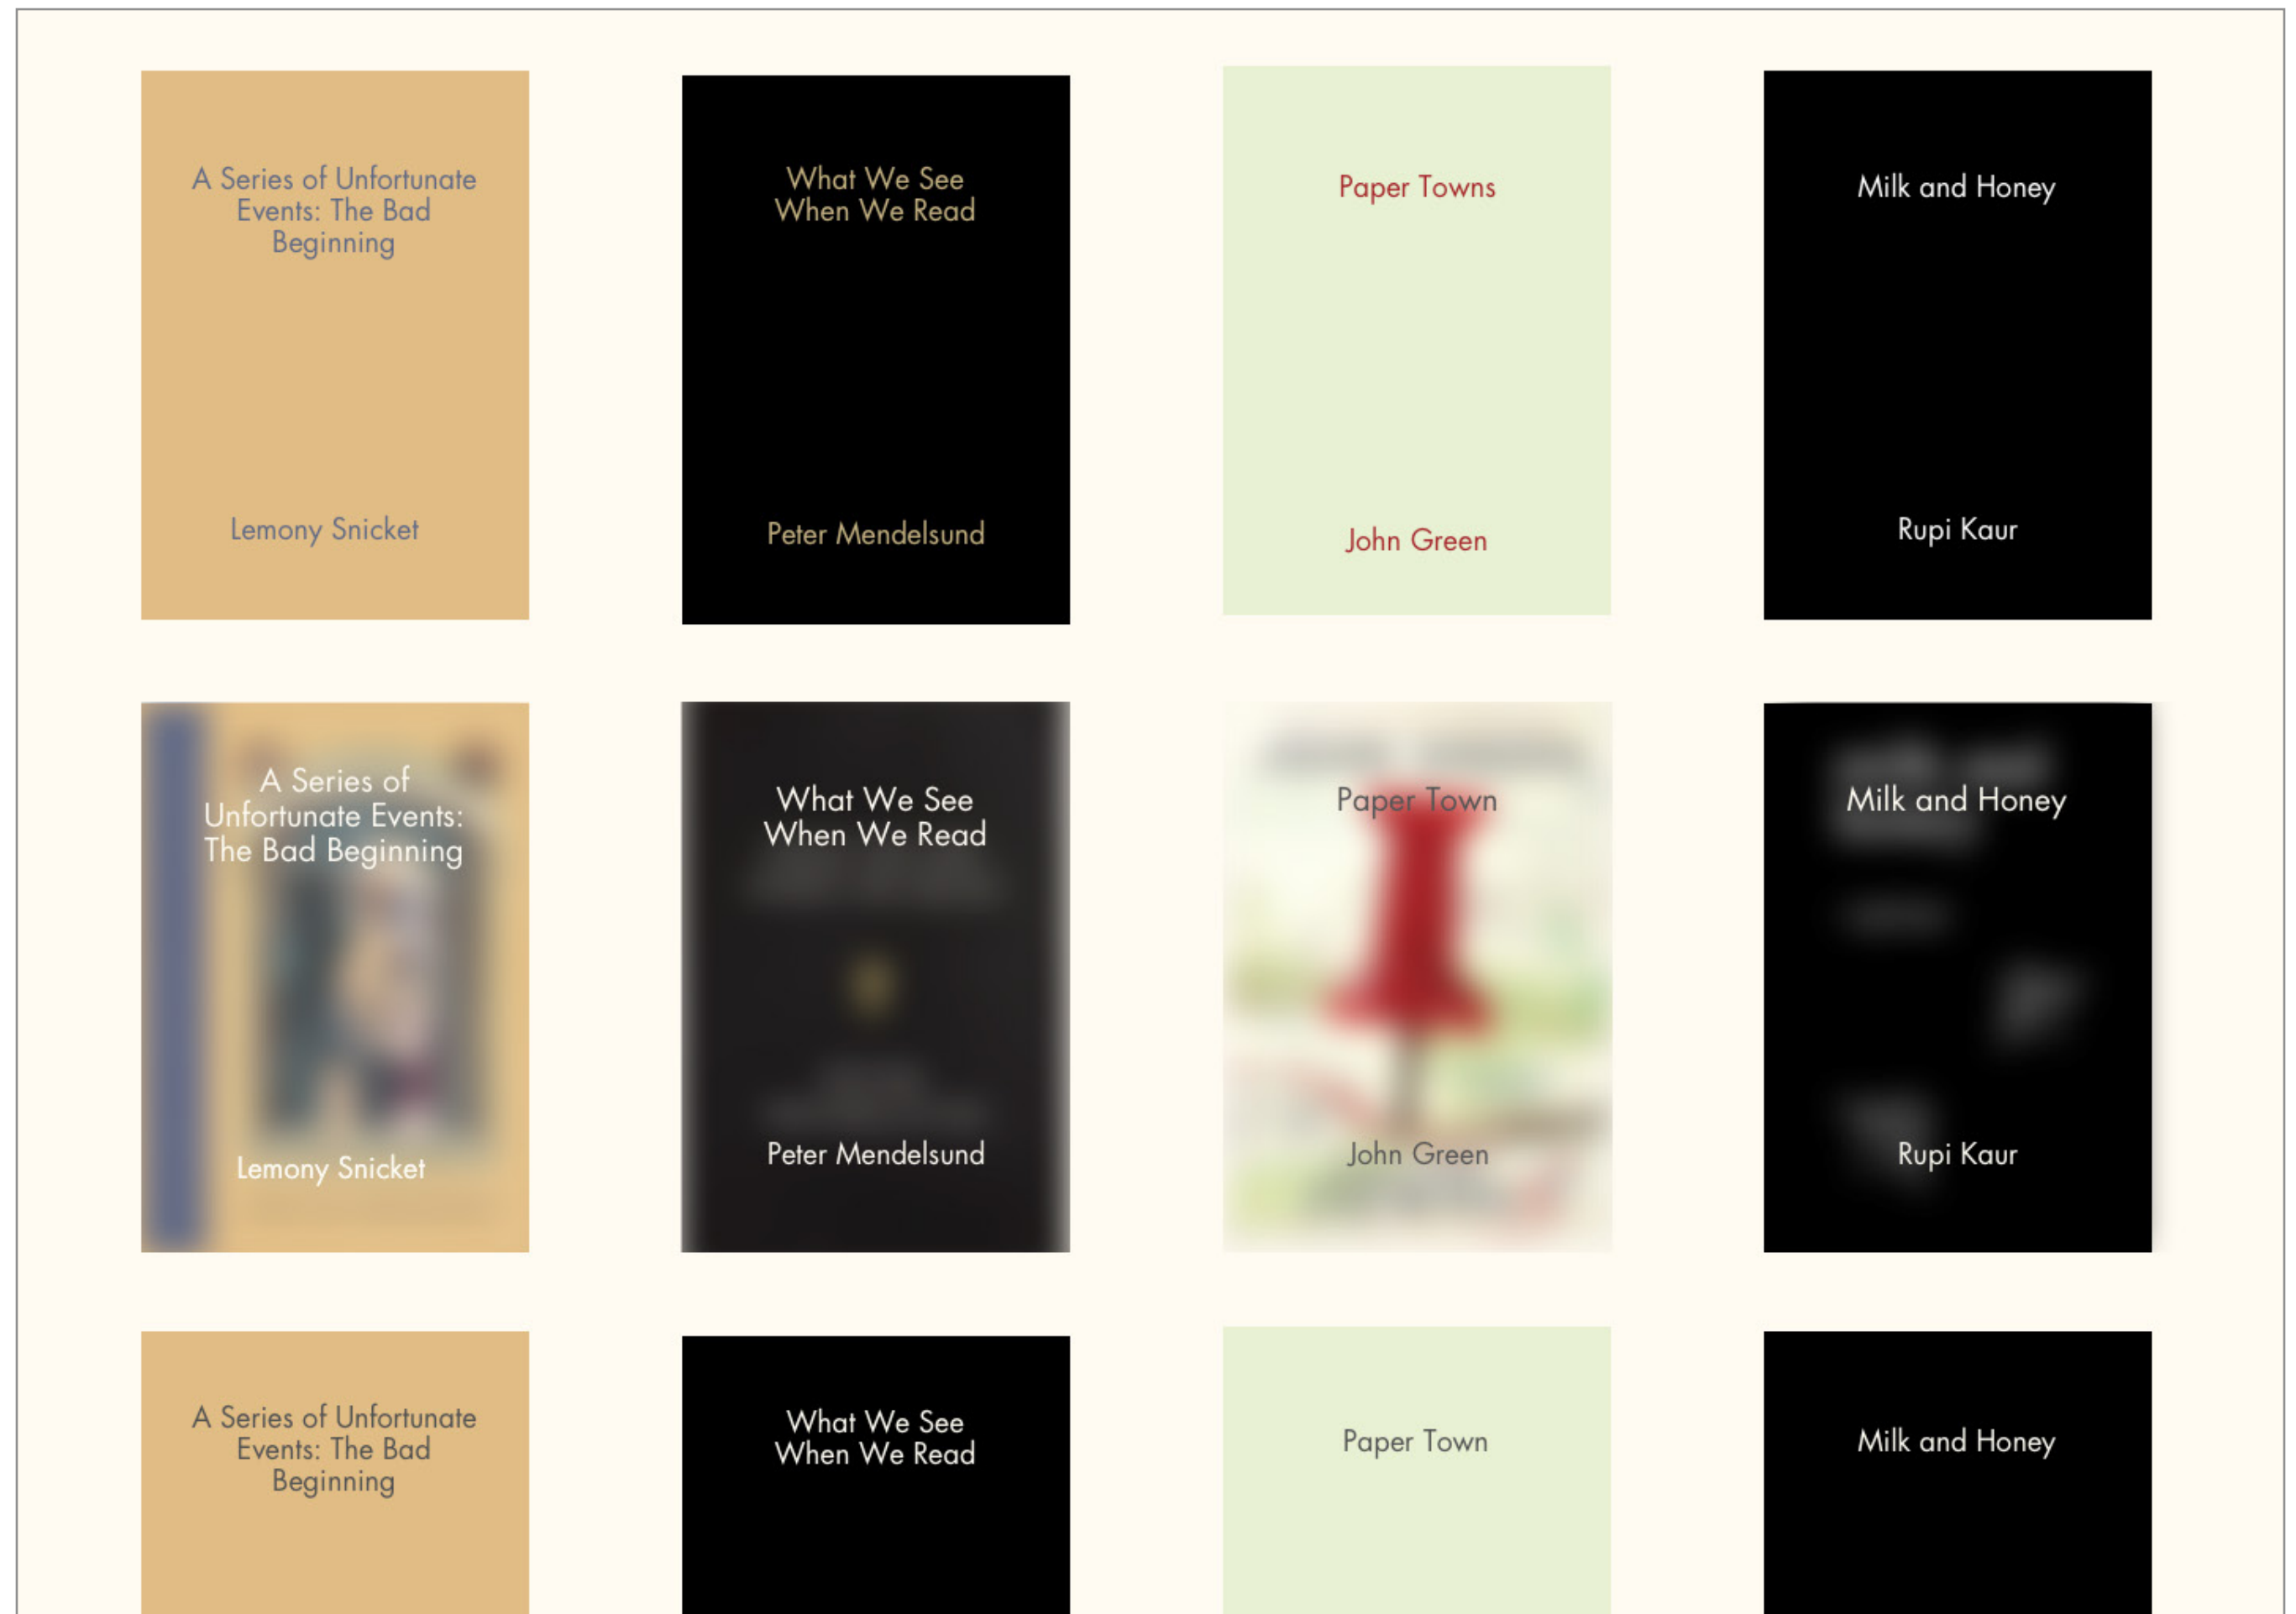

BOOKS
i did not read

Book Covers

This layout has 3 different ideas:

1. very simple book cover. The cover is the color that is most prevalent on the book cover. The title and author's color is the color that pops.
2. this is the book covers that I have at home. blurring it to make it mysteriously covered.
3. the last one is the simplest one that is just the book cover color and either black or white type.

once you click the book cover, you can go onto the summaries.

About Page

a very breif summary
of what this archive is
about and contains.

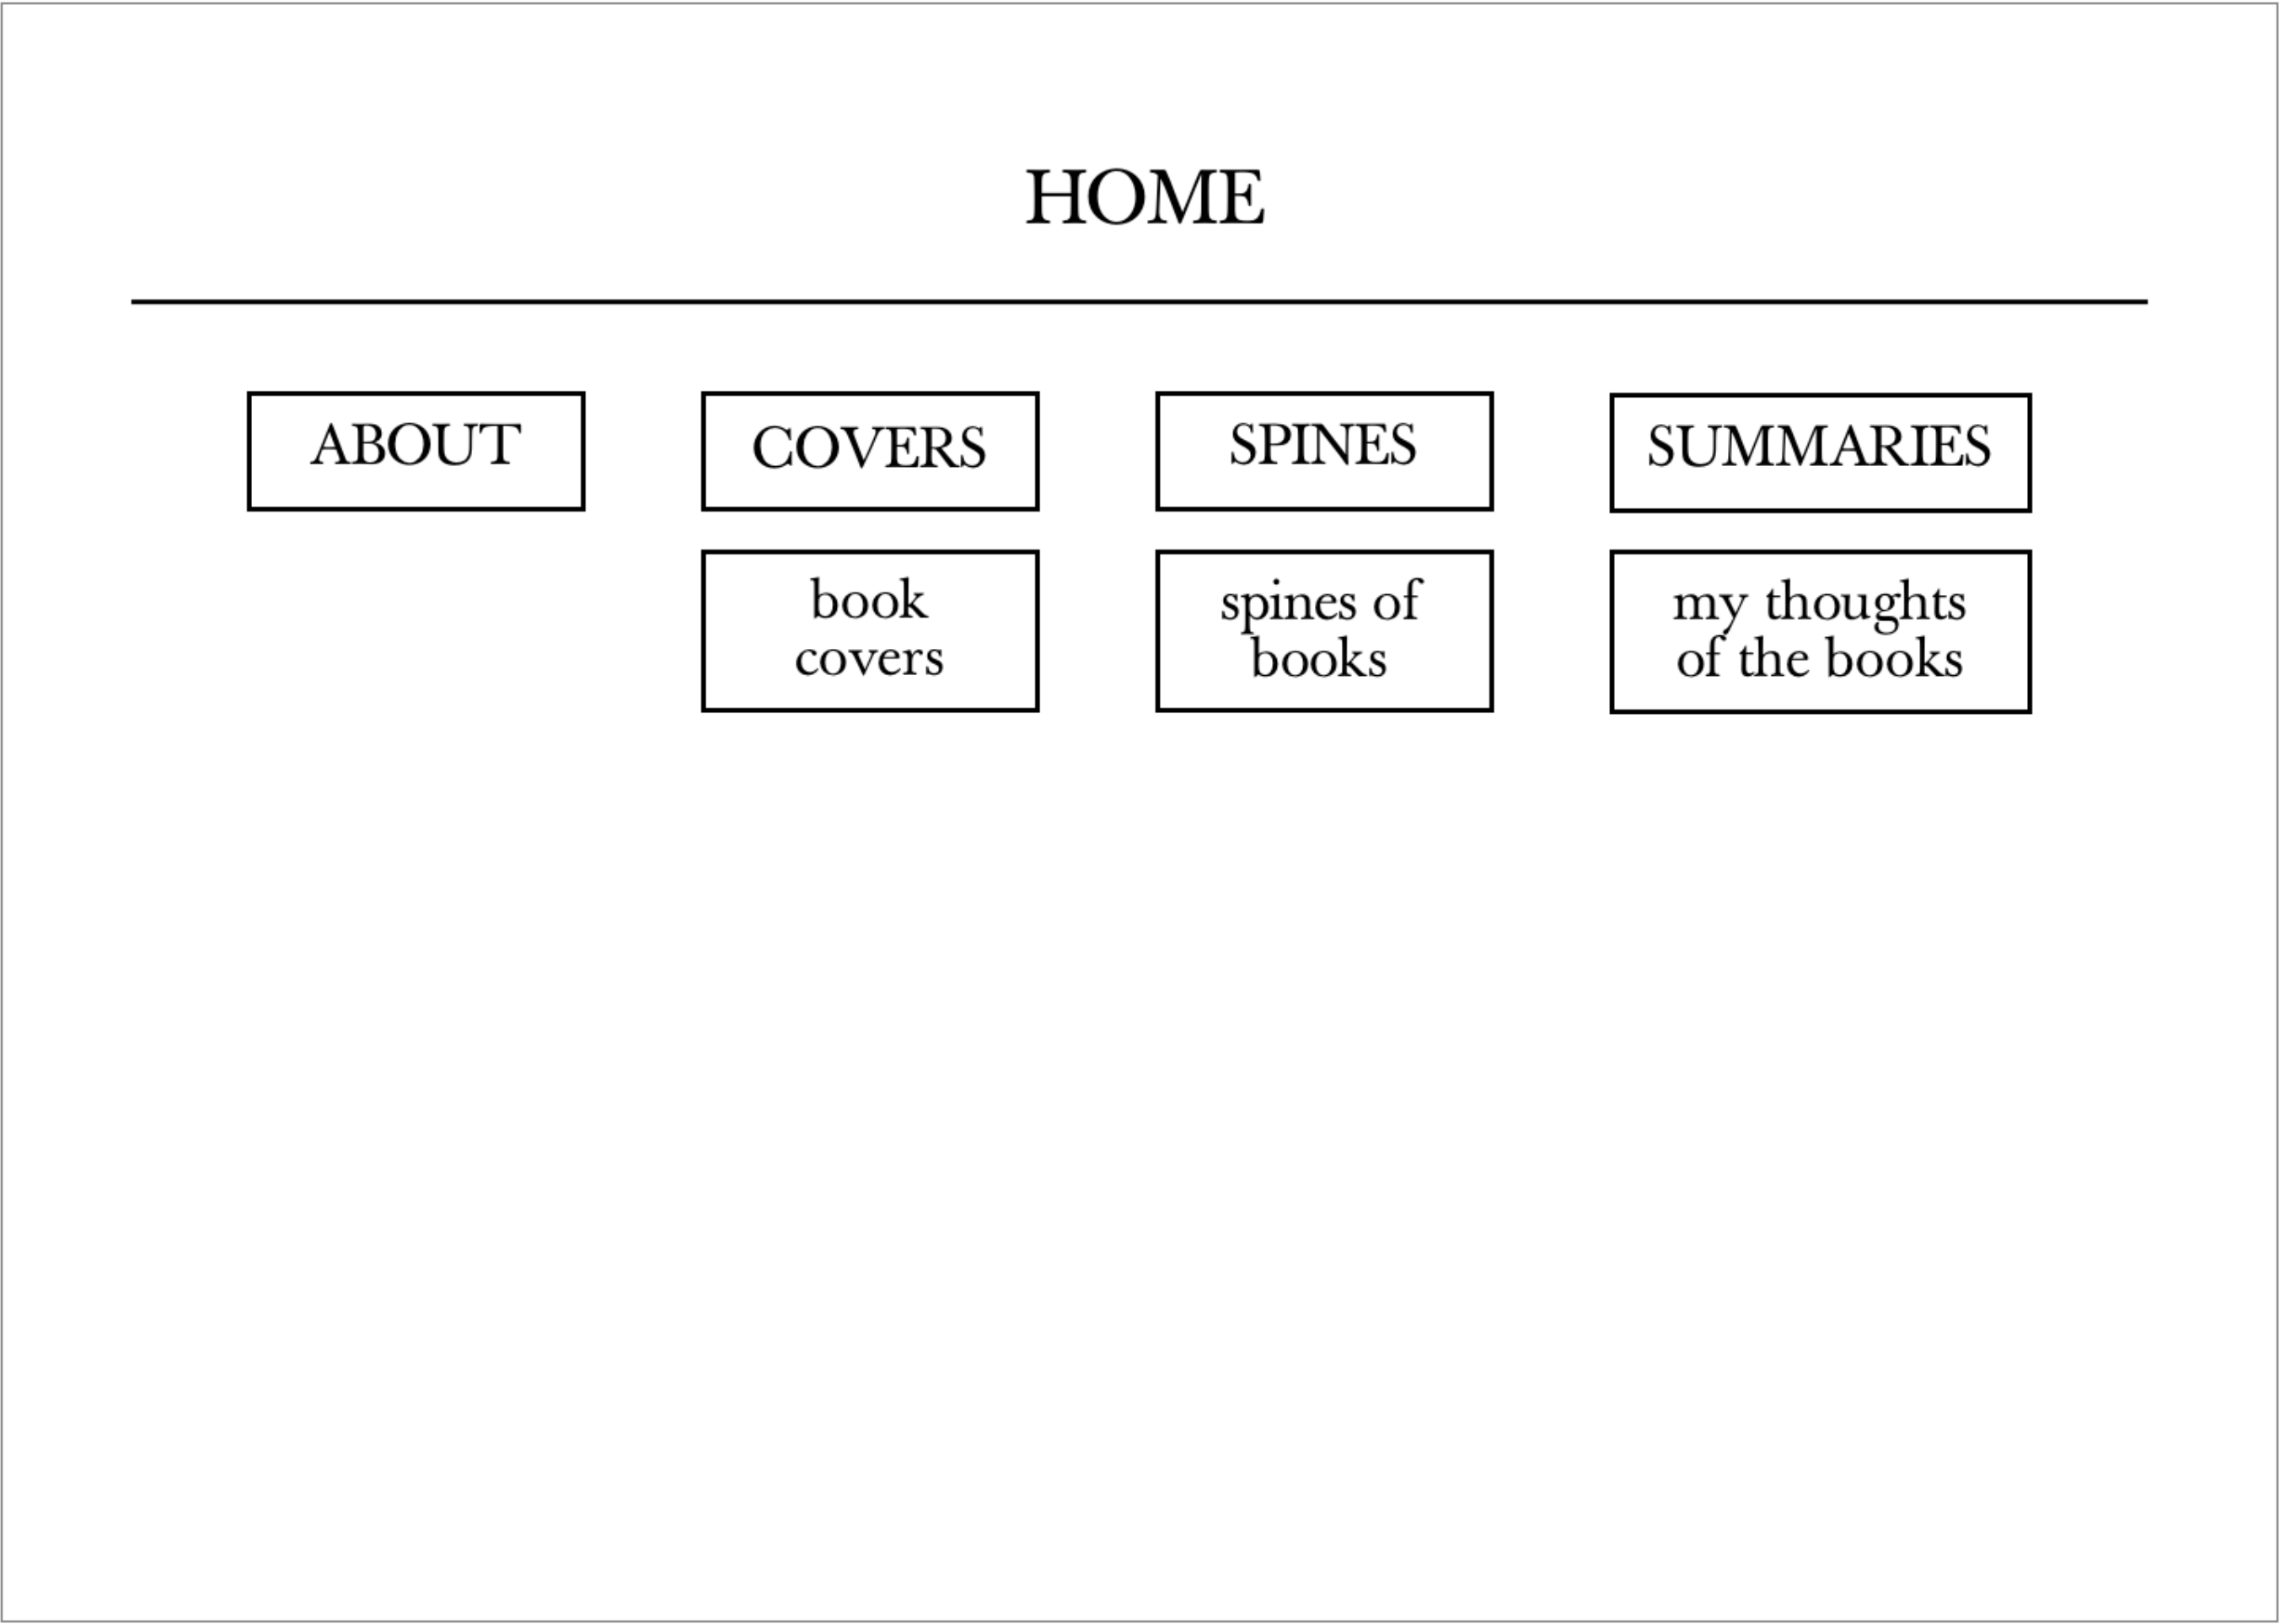

ABOUT

this is an archive of books i did not read with a
summary i wrote by only reading the first
chaper for each book.

Wireframe

This wire frame has a few more buttons to click. With the book cover and spine being two different ways to navigate the book selections

Typestyle

I chose Berthold Baskerville Book as my typeface for this website because of its traditional look.

H1 Berthold Baskerville Book Medium, 64px, 63 line spacing

Navigation: Home Page
Berthold Baskerville Book
Regular, 30px, 30 line spacing

Navigation: Other Pages
Berthold Baskerville Book
Regular, 20px, 25 line spacing

Body
Berthold Baskerville Book
Regular, 36px, 36 line spacing

Spine
Berthold Baskerville Book
Regular, 20px, 25 line spacing

This is what a link will look like.

This is what a hover link will look like.

Home

The home page is a very simple depiction of what books looked like in storage with only the spine showing. The spine are the buttons to navigate from page to page.

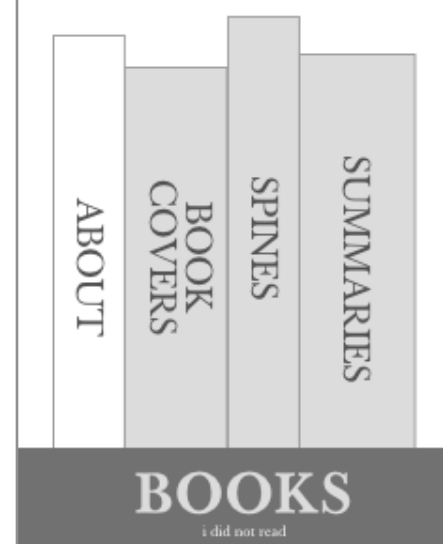

About

This home page again is a very simple layout telling you what the archive is about.

When you are on the page (in this case the about page) the navigation will highlight which page you are on.

This is an archive of most of the book I have always wanted to read but never did. There is a summary written about each book from what I think the book will be about from reading just the first chapter.

Spines

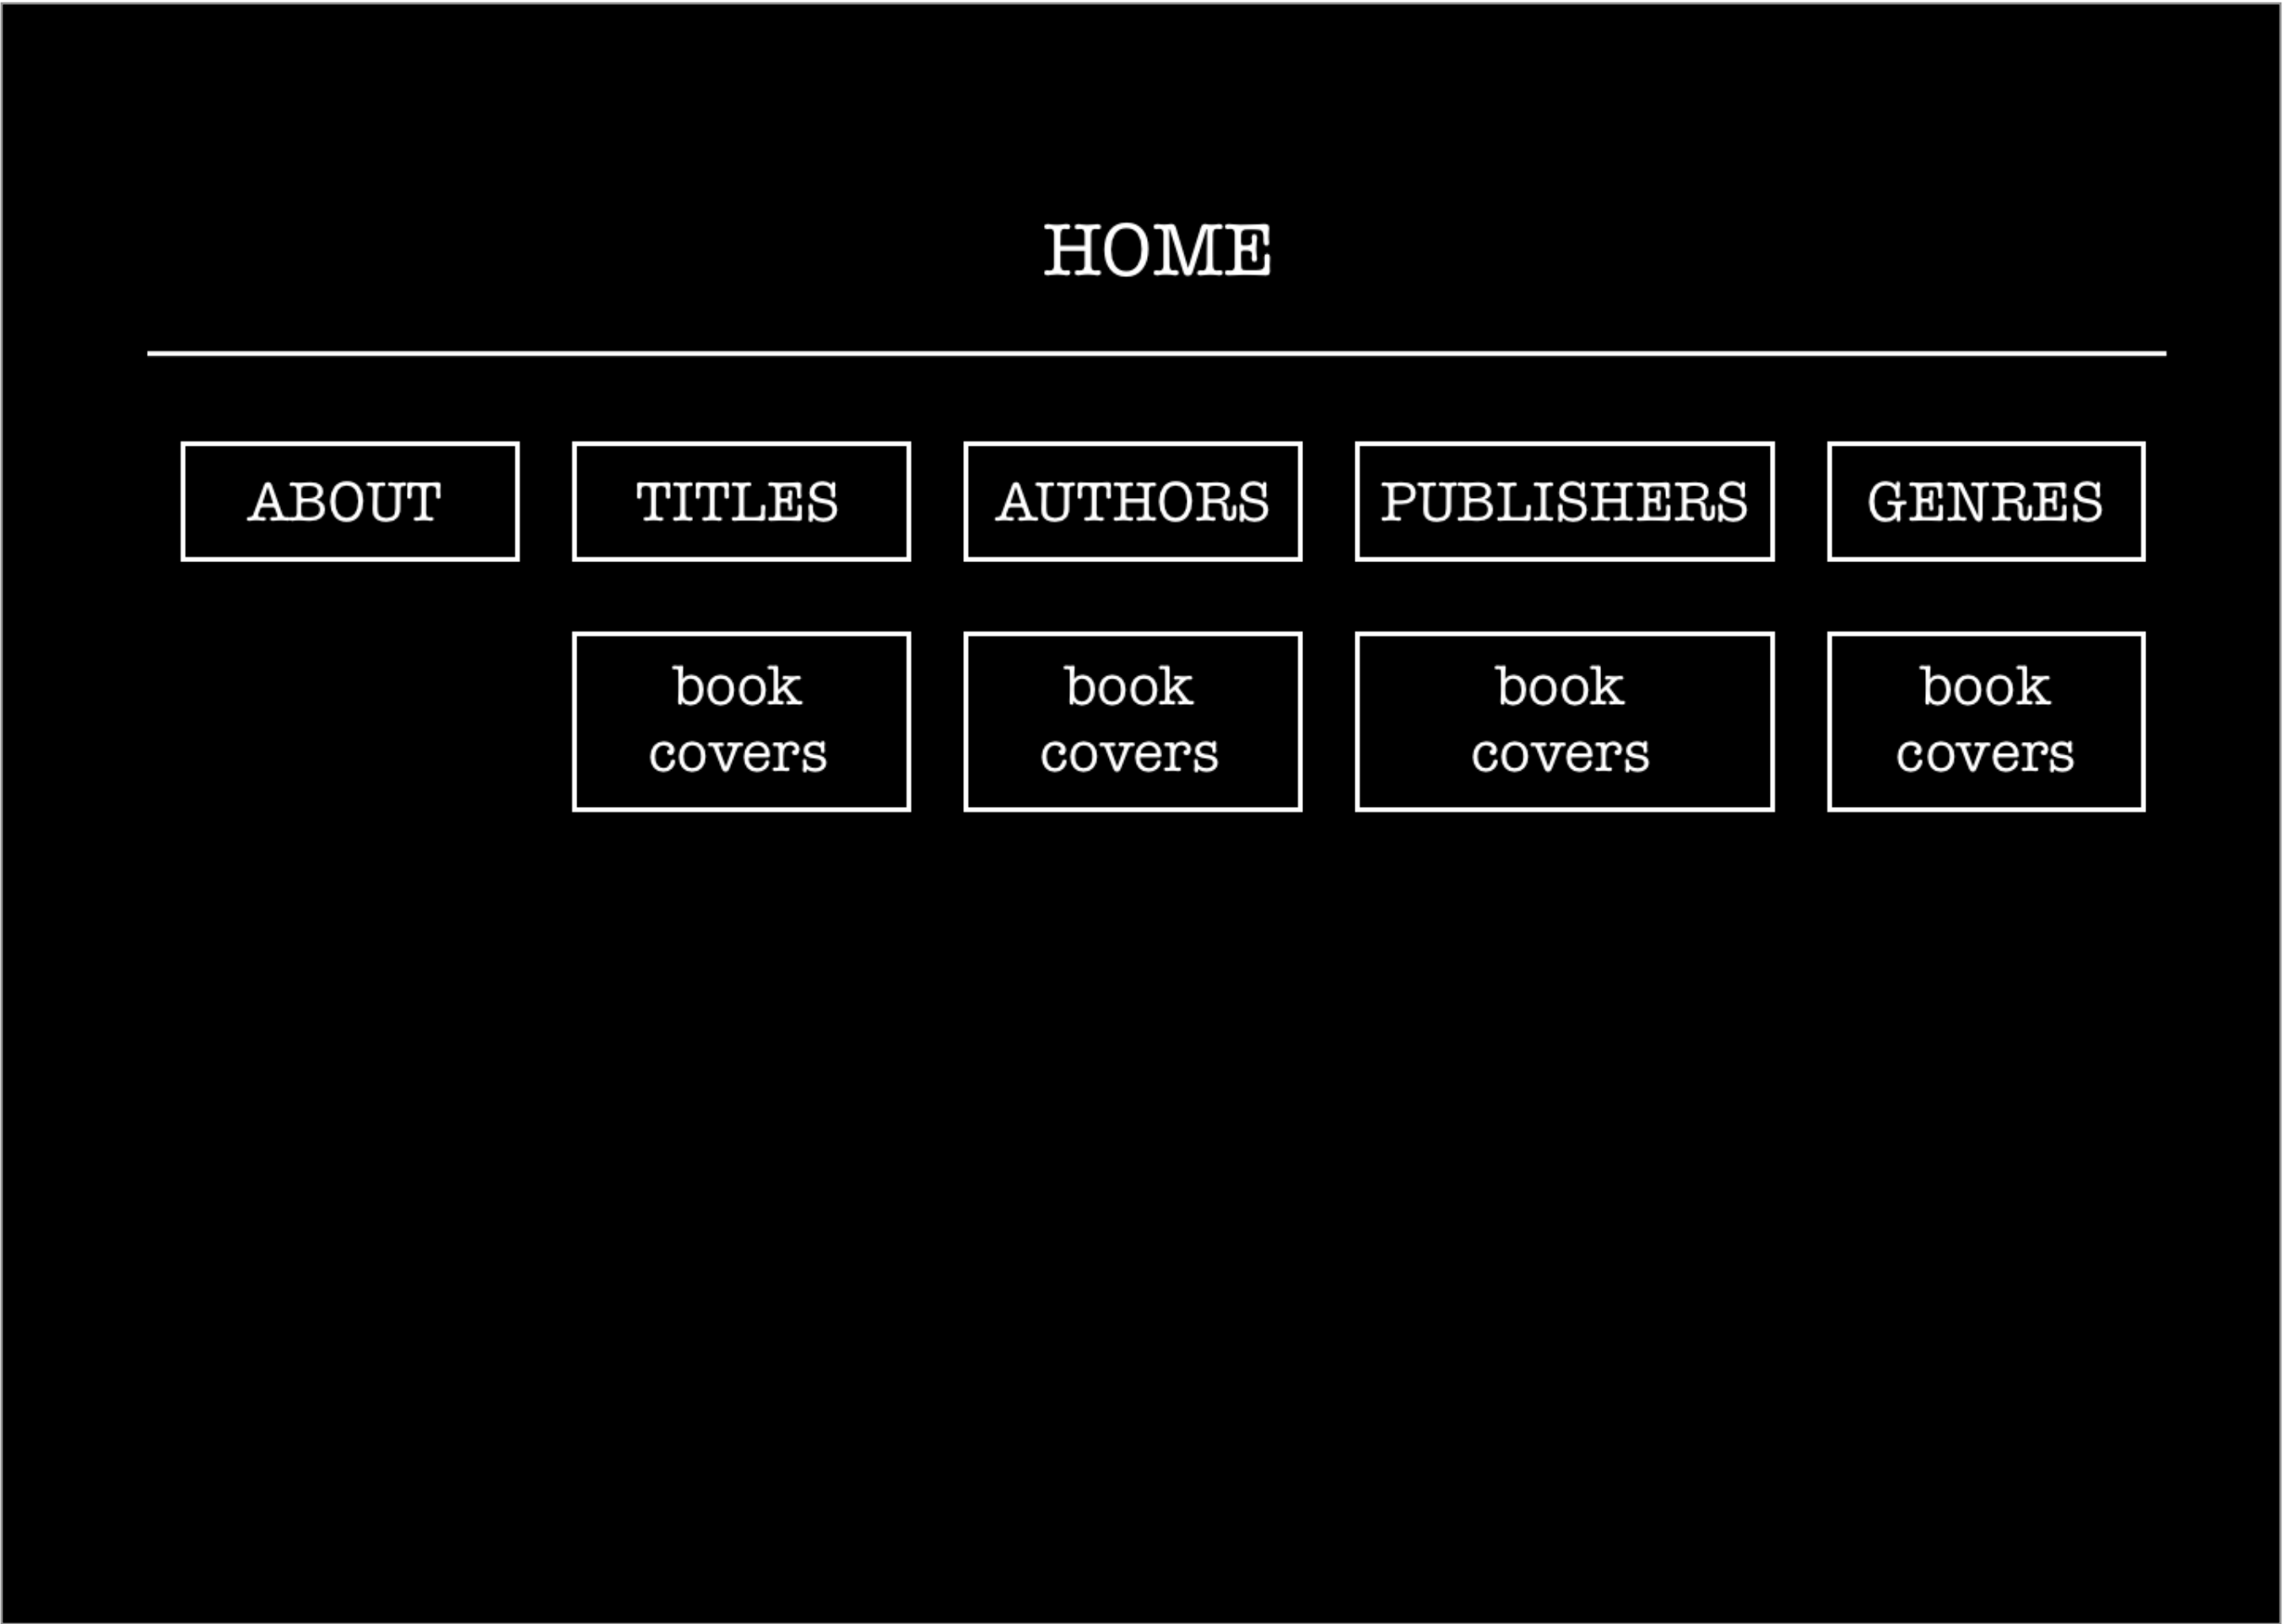

This is similar to the book cover page in Idea 1, but this is a way to navigate through spines. Using the spine of a book is how people navigate through books normally.

Wireframe

This wireframe is separated in four different categories: Title, Author, Publisher, and Genre.

Typestyle

I chose American
Typewriter
because of it's very
old-fashioned,
industrial look.

H1 American Typewriter Regular, 100px, 115 line spacing

Navigation

American Typewriter
Regular, 36px, 42 line spacing

Body

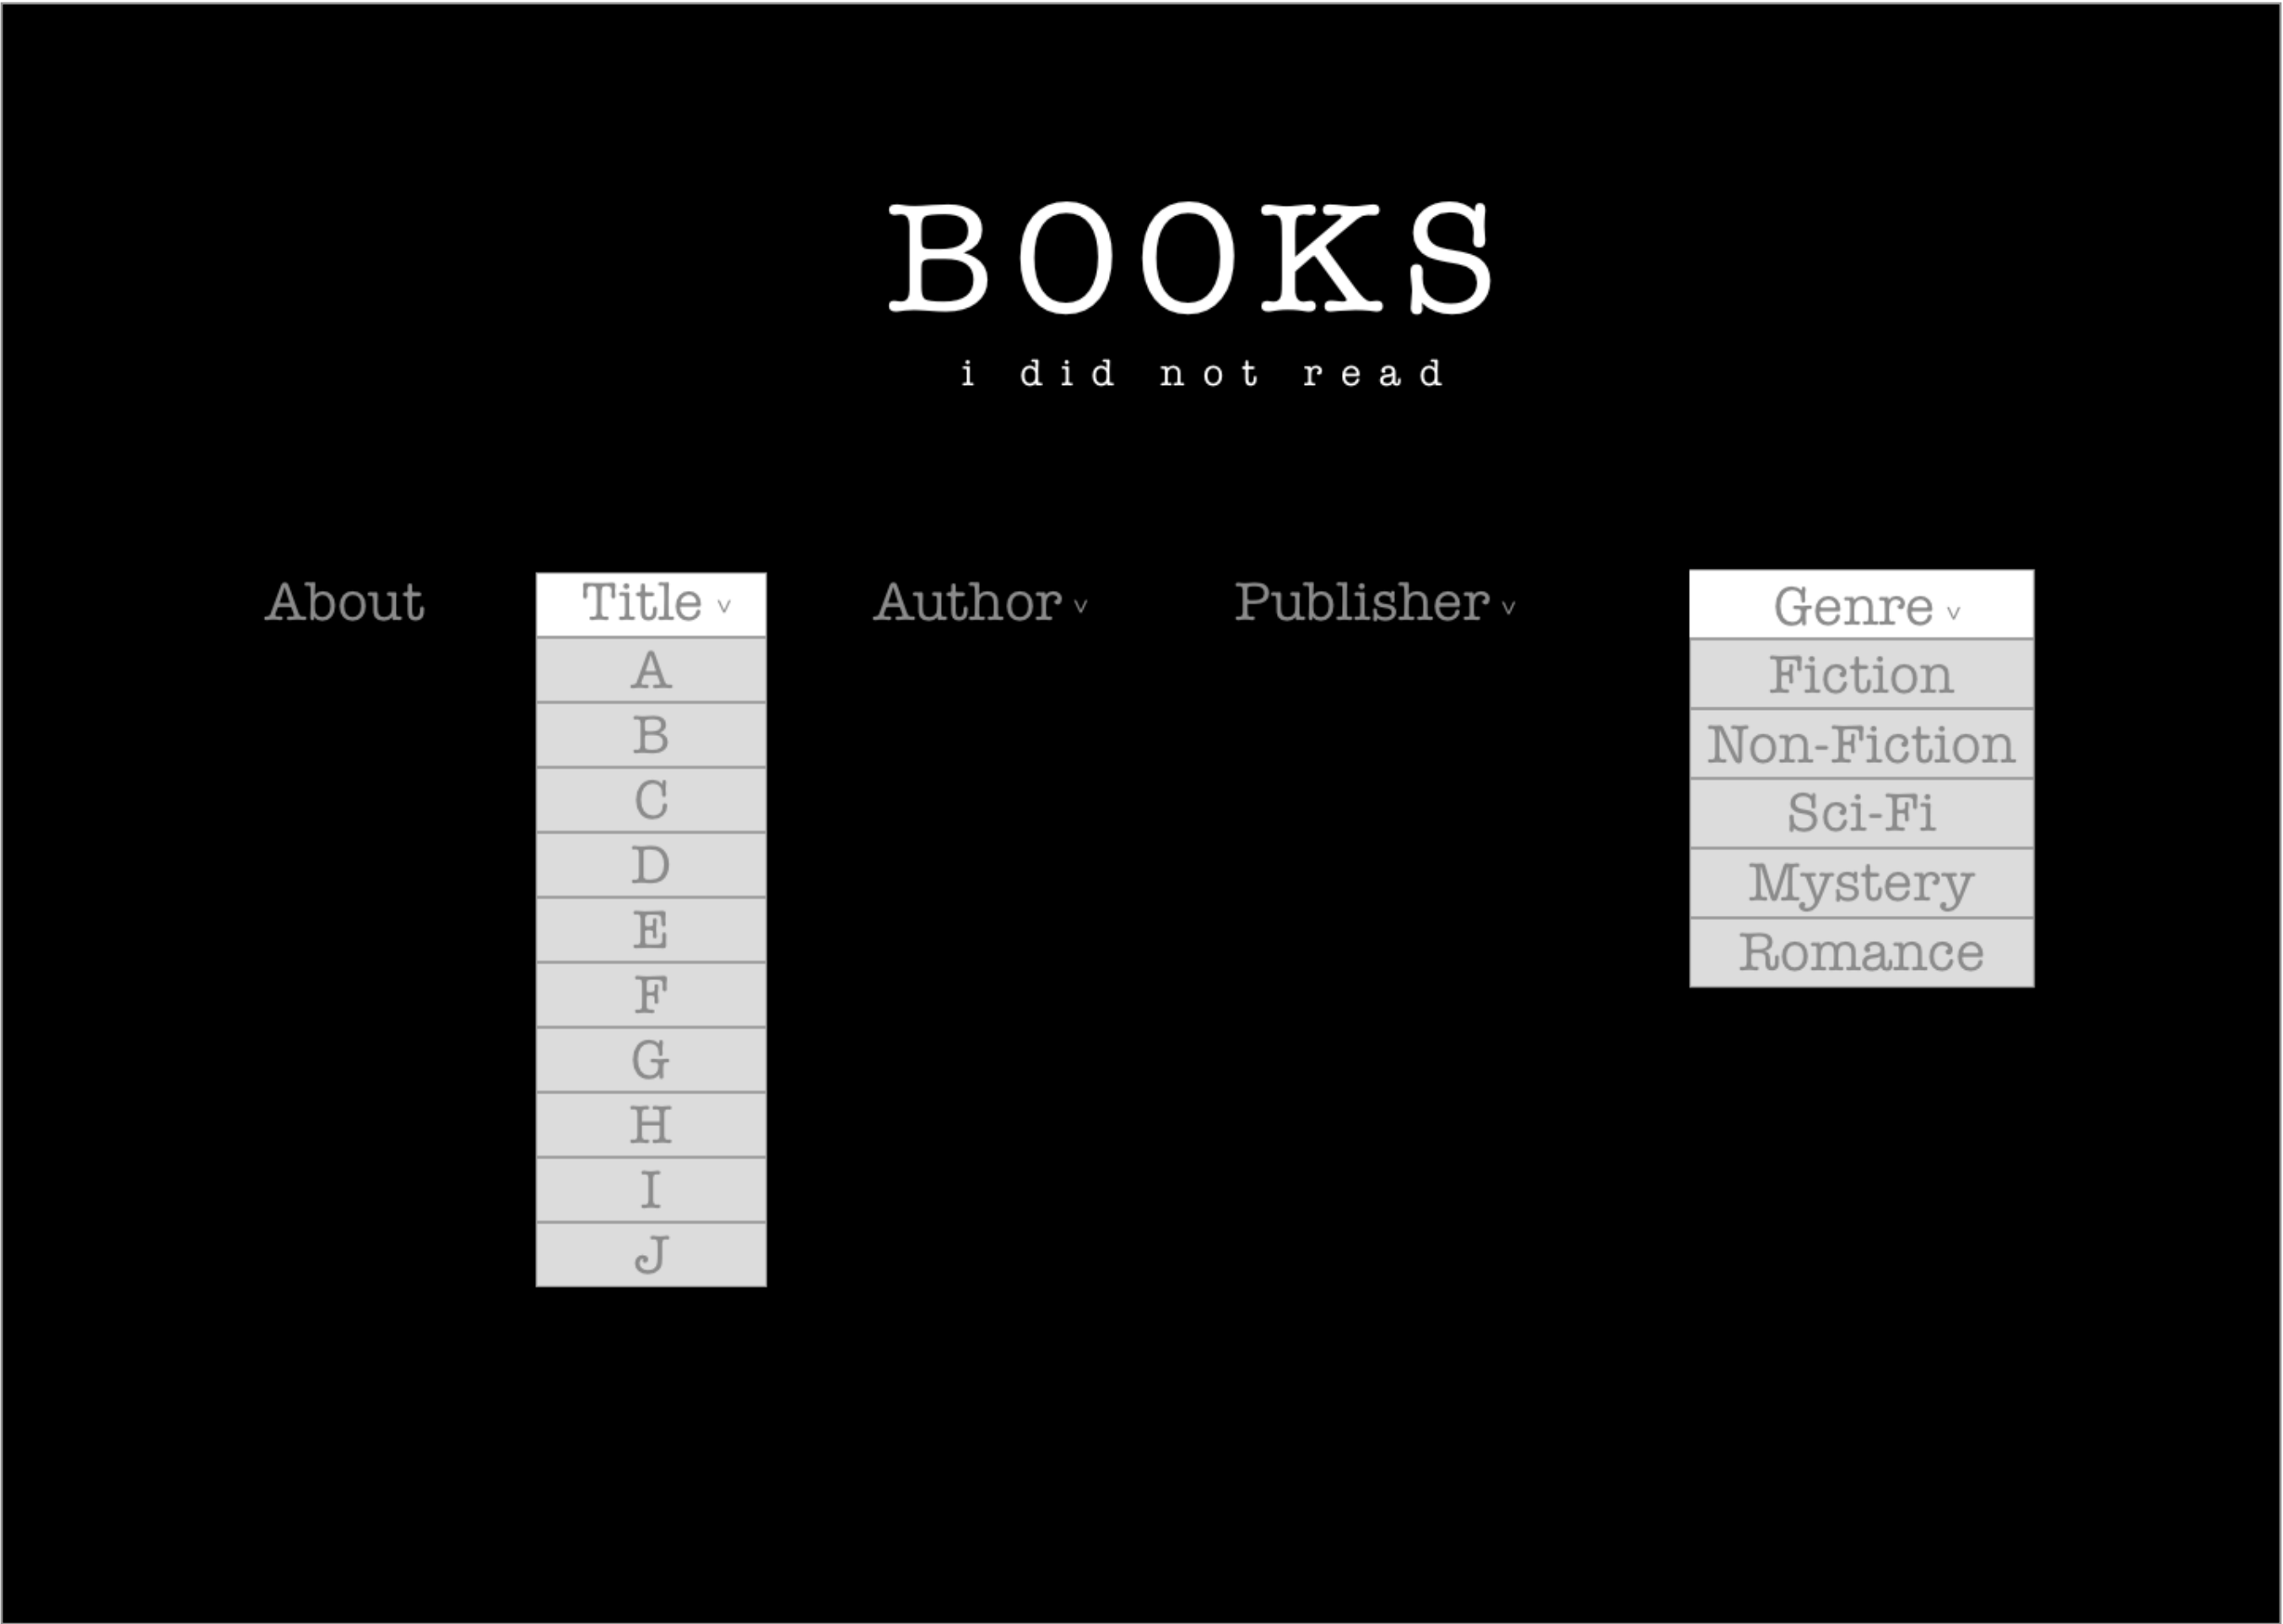

American Typewriter
Regular, 36px, 42 line spacing

This is what a link will look like.

This is what a hover link will look like.

Home

The Home page has a navigation of drop boxes. With different categories like: title, author, publisher, and genre.

About

Very simple, with the Home page button on the top-left corner.

BOOKS

i d i d n o t r e a d

This is an archive of most of the book I have always wanted to read but never did. There is a summary written about each book from what I think the book will be about from reading just the first chapter.

Book Cover

The book covers
are in a horizontal
scroll.

BOOKS			
i d i d n o t r e a d
