

Idea #1

Emoticons

Wire Frame

A very simple web-site with emoticons from the past and now.

Home

1. Hover: When you click the link, the word “Emoticons” changes to “Emojis”

2. Hover: When you click the emoticons “ :) ” it changes to the emoji that is seen now.

Idea #2
Loading...

Wire Frame

Again, a very simple layout with a very simple navigation.

Home

1. An animation/
GIF that represents the loading
symbol

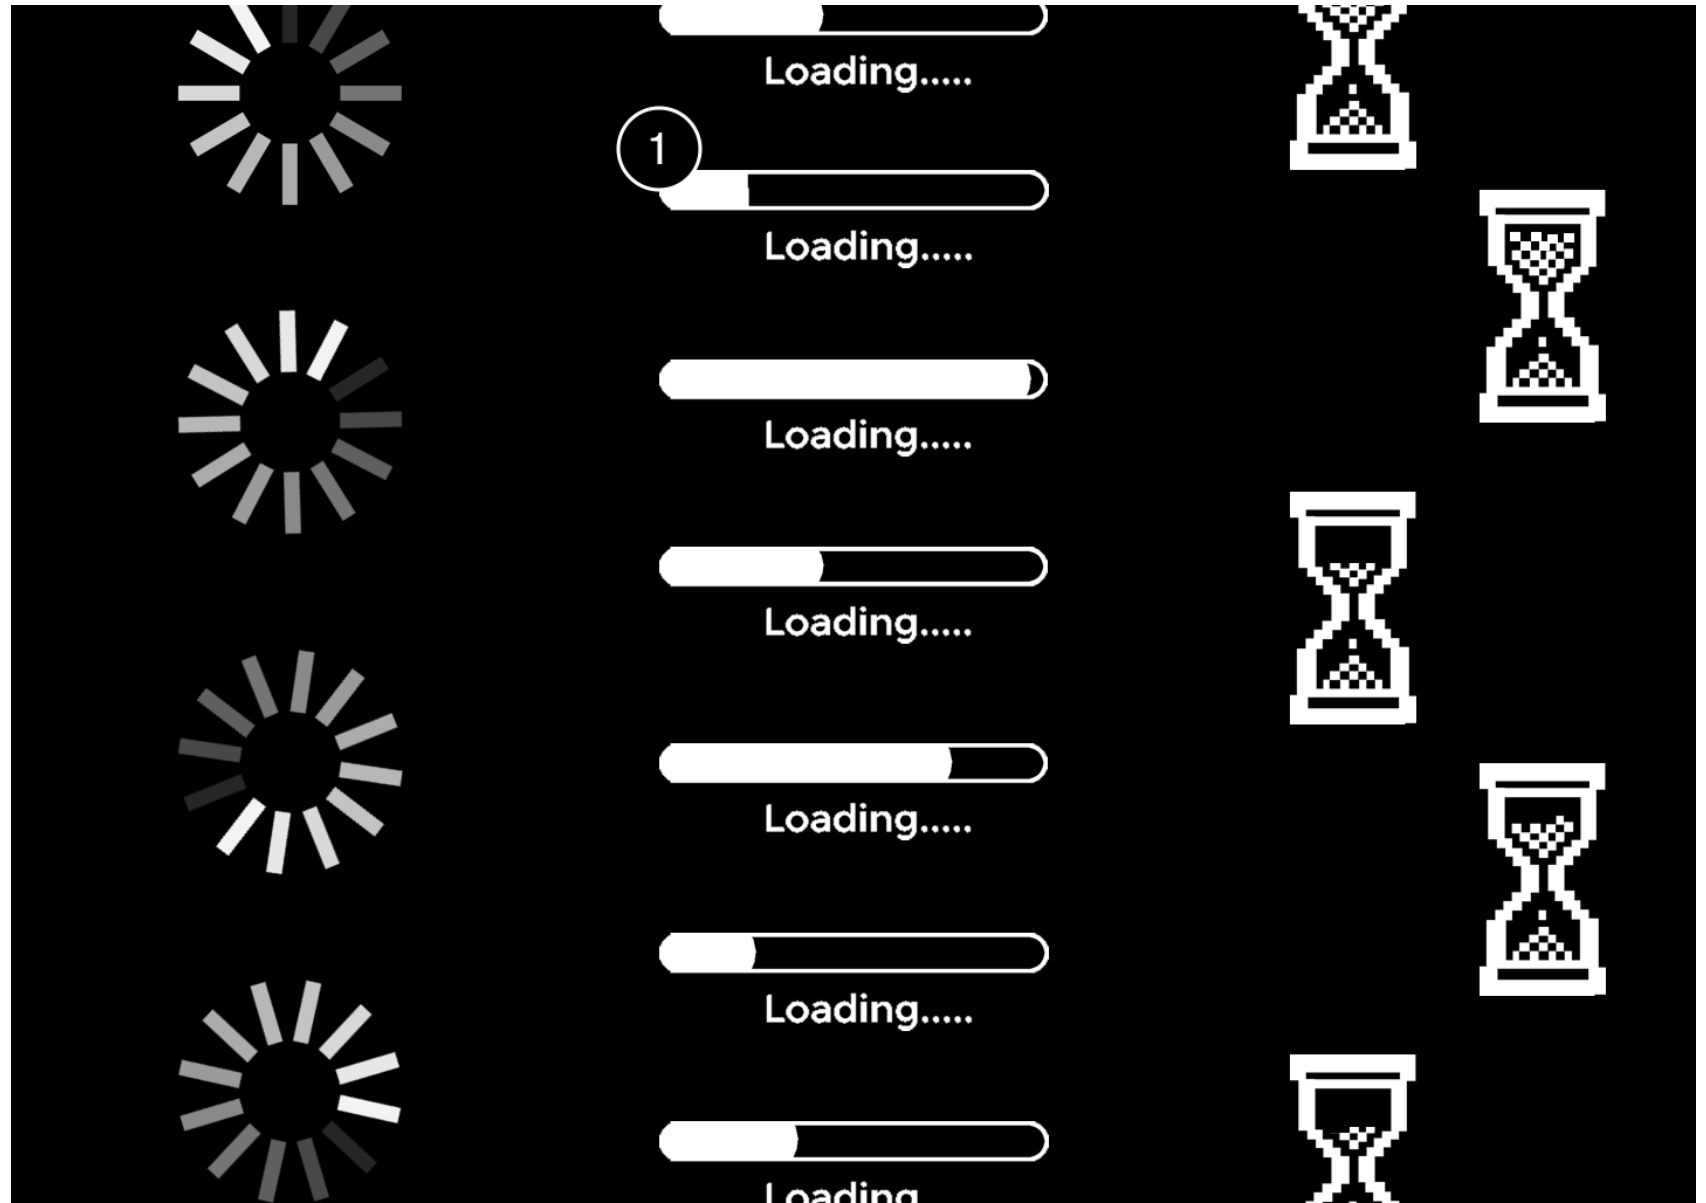

simple navigation
at the bottom of
the page

Interior

1. When you click on the different animations/GIF, a pop-up window appears.

different loading symbols

About

A description of the
idea.

This idea is based on all the annoying things that happened when we first used the internet. The internet was a lot slower, we didn't have immediate access to it whenever we needed it, and we were a lot more patient. This website will have many slow loading signs, unwanted pop ups, and messages that scare the crap out of you . . .

loading . . .
